CARE OF LAMINATES

HONEST ACRYLIC LAMINATES are manufactured with aesthetics and durability in mind. when used as recommended and with appropriate care, our laminates will last through the years. CANVASS laminate are easy to maintain.

- Cleaning should be done with water and a dean, non-abrasive Cloth.
- To remove more stubborn stains, use mild household cleansers like Colin IP gently wipe down with a non-abrasive cloth.
- Avoid the use of abrasive liquid cleansers, bleaching compounds or solution as these may damages the surface of the laminate.
- Do not place hot cookware directly on the laminate. Prolonged exposure to temperatures above 30 degree Celsius may cause damage to the laminate surface.
- Typically confirm to internationally recognize technical standards.
- Have a thickness balance of +/- 10%
- Peel off the protective film after processing.

EDGE BANDING

To achieve a smooth sleek look, shiny and reflective surfaces like acrylic sheets are the solution. The gloss edging and banding with HONEST CANVASS ACRYLIC protects orange peeling of the edges.

- Gloss level > 96 gloss points
- Incomparable surface calm (no orange peel)
- Monolithic look between board and edge.
- Wide range of colors combined with trending high gloss acrylic sheets.
- Acrylic edge- banding made with same color foil of acrylic sheets.

HONEST ACRYLIC is not responsible for any damage, cracks. Bubbles or Color fading if the sheets are not checked when delivered and are not properly applied as instructed above.

Acrylic Laminates Size :
2440mm x 1220mm (8ft x 4ft)

Thickness :
1.5mm (+/- 10%)

INSTALLATION TIPS ACRYLIC

- Before buying please check sticker on the product and ensure that you bought original product.
- Check the laminate on the time of delivery whether it has not damaged during transportation and handling and then use for installation.
- Before installation make sure the substrate (MDF, Plywood, Particle Board] is in good quality, with even surface and calibrated thickness.
- Clean the Substrate surface by cloth, sponge, soft brush or sand paper to make free from dust or grease.
- Always use water based PVACP (Polyethylene Vinyl Acetate Co-Polymer] adhesive like for laminates.
- Stir the adhesive gently before using it and do not mix water in the same.
- Spread the adhesive uniformly on both laminate and base substrate by brush, roller or adhesive spreader.
- Keep at least 2MM grove between 02 pieces of laminates, so at the time of pressing it will be easy to remove air between the Laminate and base substrate. Use soft pinch roller or normal pressing technique and the pressing should be done from the middle of the panel and move towards the sided line and corners.
- Please make sure to give sufficient amount of pressing to laminate for almost 12hrs to 15hrs to achieve full bonding strength.
- Remove the protective film within 7-15days after completion of installation.

DO'S AND DONT'S

- Store the laminates below 30C temperature. To avoid the inside cracks & stretch line, do not share acrylic sheet in roll form.
- Clean the surface of laminate with water and clean, non-abrasive cloth. We recommend cleaning with COLIN glass cleaner and soft MICRO fiber cloth.
- Glossy surfaces recommended using in vertical applications.
- Do not use cleaners based on alcohol, solvent, petrol, pinewood or oil as these may damage the surface of the laminate. Do not use other than micro fiber.
- Do not use thinner on the surface of laminates.
- Does not place hot cookware directly on the laminate as the exposure to temperatures above 30C may cause damage to the laminate surface.
- Outdoor application of the laminate with exposure to direct sunlight and weather conditions are strict not recommended. UV rays may de-shape the laminate.

| Parameters | Acrylic Laminate | High Gloss Laminate | PU Coating | Back Painted Glass |
